DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 13-19, drawn to an XML transaction definition document, classified in class 707, subclass 103R.
 - II. Claims 8-12, drawn to broadcasting transactions to a plurality of service applications, classified in class 709, subclass 313.
 - III. Claims 21-30, drawn to changing performance order of operations in a transaction, classified in class 709, subclass 311.
 - IV. Claims 31-34, 40, drawn to performing a transaction in a network, classified in class 709, subclass 219.
 - V. Claims 35-39, drawn to obtaining the transaction definition using the transaction definition name, classified in class 709, subclass 217.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as lacking a broadcast data portion, instructions to change the performance order of the operations, a distributed data network, and retrieval means to retrieve the transaction definition using the transaction definition name. Invention II has separate utility such as lacking instructions to change the performance order of the operations, a distributed

Art Unit: 2143

data network, and retrieval means to retrieve the transaction definition using the transaction definition name. Invention III has separate utility such as lacking a distributed data network, and retrieval means to retrieve the transaction definition using the transaction definition name. Invention IV has separate utility such as lacking retrieval means to retrieve the transaction definition using the transaction definition name. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-V, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph E. Avellino whose telephone number is (703) 305-7855. The examiner can normally be reached on Monday-Friday 7:00-4:00.
